SUMMARY

Results-driven DevOps Engineer with 8.5 years of experience specializing in CI/CD automation, containerized workloads, and enterprise application delivery across banking and Scottish Government projects. Proven experience transforming legacy, manual deployment processes into automated and reliable CI/CD workflows using Jenkins, TeamCity, Maven, UDeploy, Bitbucket, JFrog Artifactory, Kubernetes, and OpenShift. Skilled in release management, database deployment automation, artifact management, and platform modernization, with a strong focus on deployment reliability, operational efficiency, and minimizing application downtime.

TECHNICAL SKILLS

CI/CD & Automation	Jenkins, TeamCity, GitHub Actions, Maven, NuGet, UDeploy
Containerization & Orchestration	Docker, Kubernetes, OpenShift, Helm
Artifact & Version Control	GitHub, Bitbucket, JFrog Artifactory, SVN
Scripting & Languages	PowerShell, Bash, Python, YAML
Operating Systems	RHEL Linux, Windows Server
Databases & DB DevOps	MySQL, PostgreSQL, Liquibase (Automated Deployments)
Code Analysis Tool	SonarQube

PROFESSIONAL WORK EXPERIENCE

DevOps Engineer — Deutsche Bank, TCS
Gandhinagar, Gujarat, India

April 2022 – Present

- Led the transformation of **legacy development projects** from predominantly manual operations to automated CI/CD environments, reducing deployment effort by **90%** and streamlining build, release, deployment, and database delivery across **4 environments**.
- Centralized source code and build configurations for **10+ applications/components** in Bitbucket and integrated TeamCity with UDeploy, automating application builds and deployments across **4 environments** and reducing manual deployment activities by **90%**.
- Designed and maintained end-to-end CI/CD pipelines for **8+ C#/.NET applications** using TeamCity, Maven, NuGet, PowerShell, and JFrog CLI, automating application builds, package creation, artifact publishing, and release workflows.

- Automated packaging and publishing of **8+ .NET components** as NuGet (.nupkg) artifacts to JFrog Artifactory, supporting **releases/deployments per month** and eliminating **manual release steps**.
- Deployed and managed Kubernetes workloads, including Deployments, Ingress, and Services, using Helm charts across **4+ staging and production environments**, supporting **20+ applications/workloads** on OpenShift.
- Upgraded and maintained Java runtime versions across **10+ containerized applications** in OpenShift, completing runtime upgrades with **zero recorded application downtime** across **environments**.
- Designed and automated database CI/CD workflows using TeamCity, Maven, Liquibase, JFrog Artifactory, and UDeploy, automating database artifact packaging and controlled deployments across **UAT and production**, supporting **1 or more database releases per month**
- Deployed and configured Apache Superset on OpenShift for **50+ users**, establishing a controlled self-service analytics platform that enabled read-only data analysis without granting direct database access.

System Engineer — CAS Project, Tata Consultancy Services

March 2018 – March 2022

Gandhinagar, Gujarat, India

- Designed and maintained Jenkins CI/CD pipelines integrated with Apache Ant and SVN, supporting **8+ applications** across **environments** and reducing manual build and deployment effort by **95%**.
- Integrated SonarQube code quality analysis and quality gates into CI pipelines for **8+ projects**, automating code quality checks before deployment.
- Automated EAR package builds for **8+ enterprise Java applications** using Apache Ant, standardizing application packaging and deployment to JBoss application servers.
- Administered bare-metal **RHEL Linux server** environments, conducting proactive patch management, user access tuning, and structural log monitoring.
- Diagnosed and resolved environment-specific configuration anomalies across staging boundaries to ensure continuous pipeline availability.
- Automated database, code repository, and staging environment backups using Shell scripting, Linux Cronjobs, and Windows Task Scheduler, reducing manual backup effort by **90%**.
- Provisioned and renewed SSL/TLS certificates across JBoss servers to establish hardened, secure HTTPS communication tunnels.
- Enforced security compliance frameworks on Linux platforms by leveraging advanced Firewall controls and system hardening techniques.

EDUCATION

Master of Computer Applications (MCA) - Sastra University, Tamil Nadu

Jun 2019 – Mar 2022

B.Sc. In Information Technology - Saurashtra University, Gujarat

May 2014 – Mar 2017

CERTIFICATIONS

- AWS Certified Cloud Practitioner (May 2023 – May 2026)
- Microsoft Azure AI Fundamentals (AI-900), 2023
- Microsoft Azure Fundamentals (AZ-900), 2022

ACHIEVEMENTS & LANGUAGES

Achievements: Best Team Award (TCS, 2021) • Learning Achievement Award (TCS, 2019)

Languages: English (Proficient) • Hindi (Proficient) • Gujarati (Native)
